SUMMARY

Full Stack MERN Developer with hands-on experience building AI-powered web applications, including an AI code-review assistant and two production-style full-stack platforms. Solved 250+ Data Structures and Algorithms problems on LeetCode and maintains a 9.15 CGPA in Information Technology. Skilled in React.js, Node.js, Express.js, MongoDB, and REST API development, with a track record of automating workflows and integrating AI features (Gemini AI) into full-stack products.

EXPERIENCE

Web Developer — Innovexis

- Developed an AI-powered Code Review Assistant that automated detection of bugs and errors across submitted code, reducing manual review effort for users.
- Implemented static code analysis features that flagged code-quality issues before runtime, improving early bug detection.
- Integrated AI-based review suggestions that generated actionable fixes for identified errors, streamlining the debugging process for end users.

EDUCATION

B.Tech in Information Technology

JSPM Rajarshi Shahu College of Engineering, Pune

Expected Graduation: 2028 | CGPA: 9.15 / 10

TECHNICAL SKILLS

- Languages: C, C++, Java, JavaScript, HTML, CSS
- Frontend: React.js, Tailwind CSS, Bootstrap, Redux, React Router
- Backend: Node.js, Express.js
- Database: MongoDB, Mongoose, SQL, MySQL
- Authentication: JWT, Passport.js
- Tools: Git, GitHub, Postman, VS Code, LeetCode
- Concepts: REST APIs, MVC Architecture, CRUD Operations, Responsive Design
- Problem Solving: Data Structures & Algorithms — solved 250+ questions on LeetCode

PROJECTS

JobTrack -Ai powered Full stack internship and job Tracker

- Developed a full-stack AI-powered Job & Internship Tracker using React.js, Node.js, Express.js, MongoDB, and Tailwind CSS.
- Designed an interactive dashboard to track job applications, interview progress, and application analytics with a fully responsive user interface.
- Built secure JWT authentication, RESTful APIs, and integrated Cloudinary for resume file storage and management.

AI Expense Tracker — Full Stack Finance Platform

- Built an AI-powered expense tracking application using Next.js, Node.js, Express.js, and MongoDB with secure user authentication.
- Automated categorization of expenses using AI, eliminating manual tagging for users tracking transactions.
- Designed budget management and analytics features that delivered AI-driven financial insights and predictions from transaction history.
